# How to change W10M Device name.

The Device name is used across the system as the identifier for USB, Bluetooth & Wi-Fi Connections.
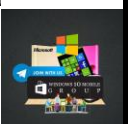

With-PC

> Connect your W10M Device to your Windows PC using a Data connection.

> Wait until the PC recognize the Phone and go to "**This PC**" to access the connected storage devices.

> Right click on your W10M device and select "**Rename**"

> Type the name you want & press enter to save it

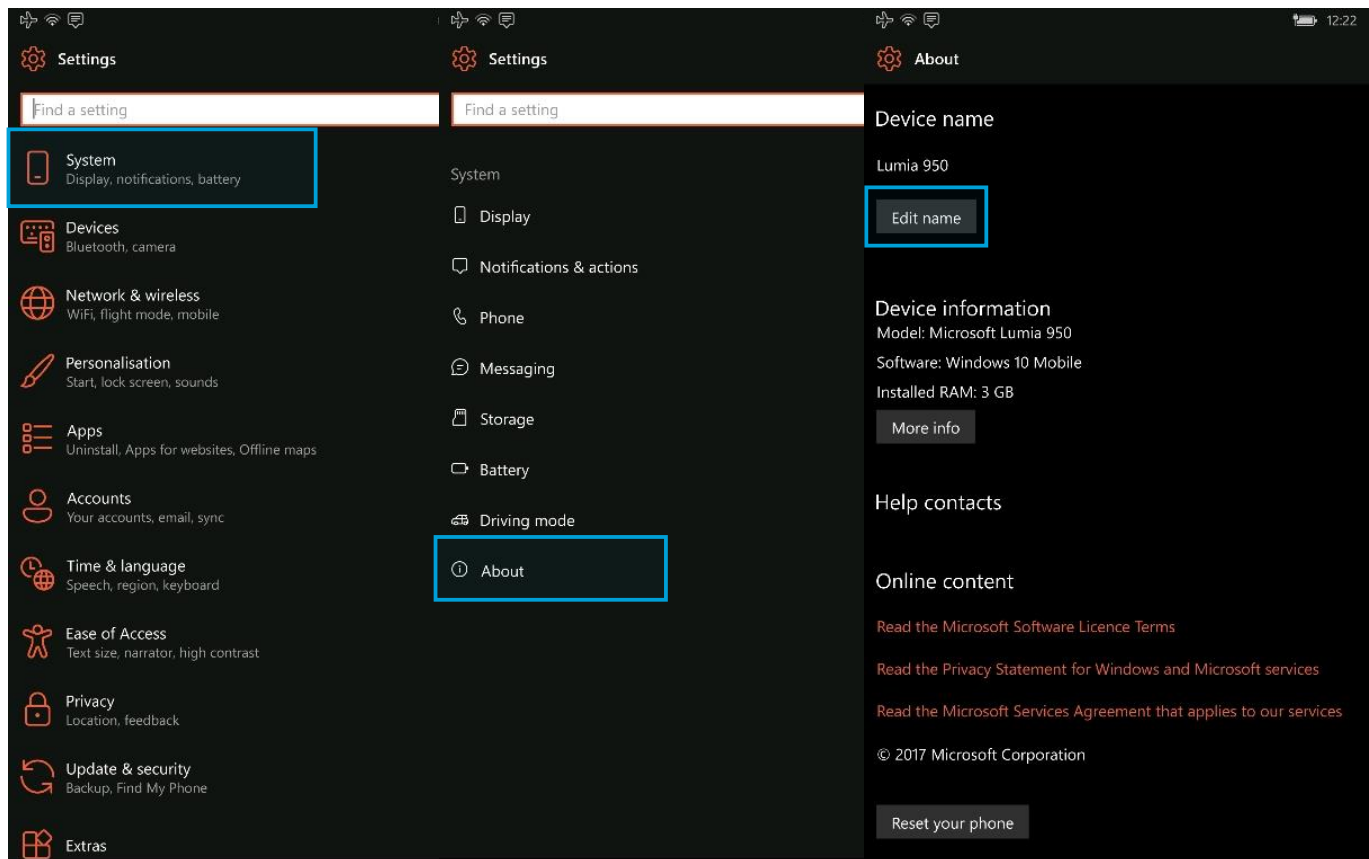

Windows 10 Mobile (Lumia) Group :- https://t.me/Windows10Phone

Without-PC

> Go to "**Settings → System → About**"

Click "**Edit name**" and type your preferred name.

> Then click "**Save**" once you are done typing to save the name.
